

EU Declaration of Conformity and Risk Assessment – Cable Clamps

Product Description

WKK's cable clamps are made of durable plastic or metal and are designed for the secure fixing of cables, conduits, or pipes to profiles or surfaces without drilling. They are available in different sizes and shapes to match various profile thicknesses and cable diameters.

Limits of Use

Cable clamps are intended exclusively for bundling and fixing cables and conduits in stationary installations. They must not be used for load-bearing applications or dynamic loads (e.g., moving cables).

Hazard Analysis

1. **Mechanical Hazards:** Risk of injury from sharp edges during handling or installation.
2. **Installation Hazards:** Improper fitting could result in loose cable fastening or falling cables.
3. **Environmental Hazards:** Material degradation under UV radiation or unsuitable chemical exposure.

Risk Assessment

- Mechanical risks are low with proper handling and installation.
- Installation risks are low with correct selection and installation according to specifications.
- Environmental risks are minimal if UV-resistant or chemical-resistant materials are chosen appropriately.

Risk Mitigation

1. **Correct Installation:** Choose clamps according to cable size and environmental conditions.
2. **Use of Proper Tools:** Apply clamps firmly without damaging the surface or cable.
3. **Material Selection:** Use UV- or chemical-resistant variants if required.

Warnings and Instructions for Use

- Install cable clamps according to the manufacturer's installation instructions.
- Not suitable for load-bearing or dynamic mechanical stress.

Declaration of Conformity

WKK GmbH hereby confirms that the cable clamps comply with all applicable European standards and directives.
