EU Declaration of Conformity and Risk Assessment – Standard Plastic Cable Ties

Product Description

WKK's standard plastic cable ties are made of polyamide 6.6 and are used for bundling and securing cables and wires in a wide variety of industrial and commercial applications. They are halogen-free, silicone-free, and available in UV-resistant versions. They are flame-retardant according to UL 94 V-2.

Limits of Use

The cable ties are intended exclusively for bundling and fixing cables and conduits. They must not be used for load-bearing or safety-critical applications.

Hazard Analysis

1. **Mechanical Hazards:** Risk of injury from sharp edges during installation or removal.
2. **Thermal Hazards:** Risk of material degradation when used beyond the specified temperature limits.
3. **Environmental Hazards:** Risk of UV degradation when used outdoors without UV-resistant material.

Risk Assessment

- Mechanical risks are low with correct installation.
- Thermal risks are low within specified operating temperatures.
- Environmental risks are minimal when UV-resistant types are used for outdoor applications.

Risk Mitigation

1. **Product Selection:** Choose the correct type depending on temperature and environmental exposure.
2. **Appropriate Tools:** Use tensioning and cutting tools to avoid manual injuries.
3. **Inspection:** Regularly check cable ties for signs of brittleness or damage.
4. **Storage:** Store in a cool, dry place away from direct sunlight.

Warnings and Instructions for Use

- Use only for bundling and securing cables and wires.
- Not intended for load-bearing or personal safety applications.

Declaration of Conformity

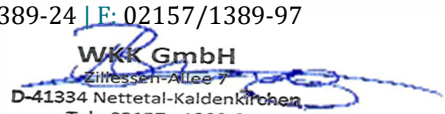

WKK GmbH hereby confirms that the standard plastic cable ties comply with all applicable European standards and directives.
